About this Guide

This guide offers step-by-step instructions for updating MegaFi firmware. Please follow these instructions to update your MegaFi firmware prior to installation or in the event of post installation as needed.

Note/Warning: This document is for updating the firmware on SHIELD MegaFi units **ONLY**. If you have a previous HPUE device – like the AW12+EI, **DO NOT USE THIS**, as it will brick your unit.

Note: Software and Firmware are used interchangeably within this document and are meant to mean the same thing.

Step 1: Download MegaFi Firmware

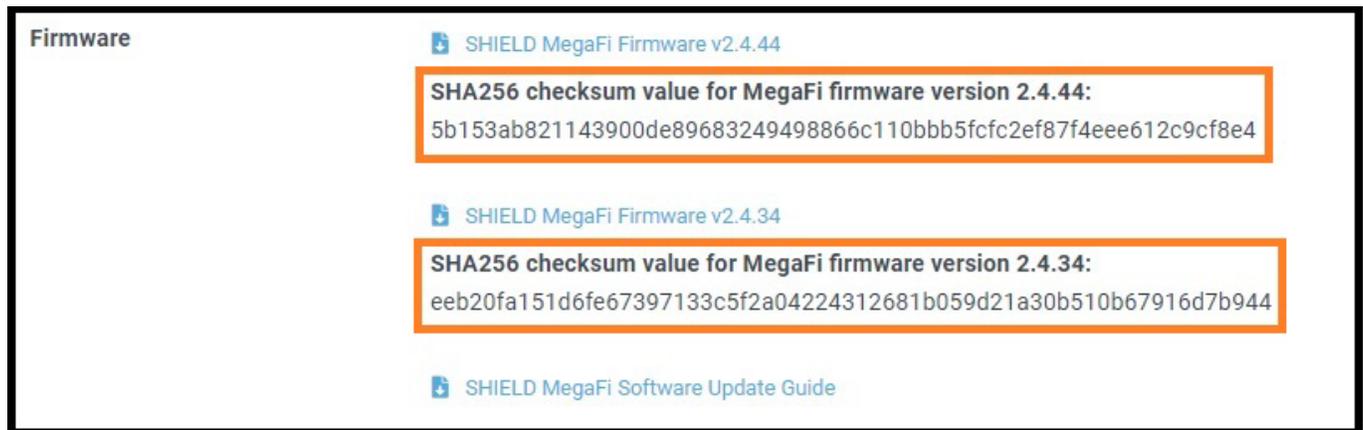

Select the following link to download the MegaFi firmware version **BIN** file from the [Nextivity Product Support](#) page under the FirstNet HPUE tab to a local Windows 10 or Windows 11 computer.

- 1) Download the firmware file itself (Example: Software-MegaFi-v2.4.44.bin)

Step 2: Checksum Value

From the download location, take note of the version-unique checksum value next to the **BIN** file.

- 1) This will be a SHA256 alpha-numeric value.

Step 3: Connect MegaFi to PC

Connect an Ethernet cable between the PC and the LAN port on the MegaFi.

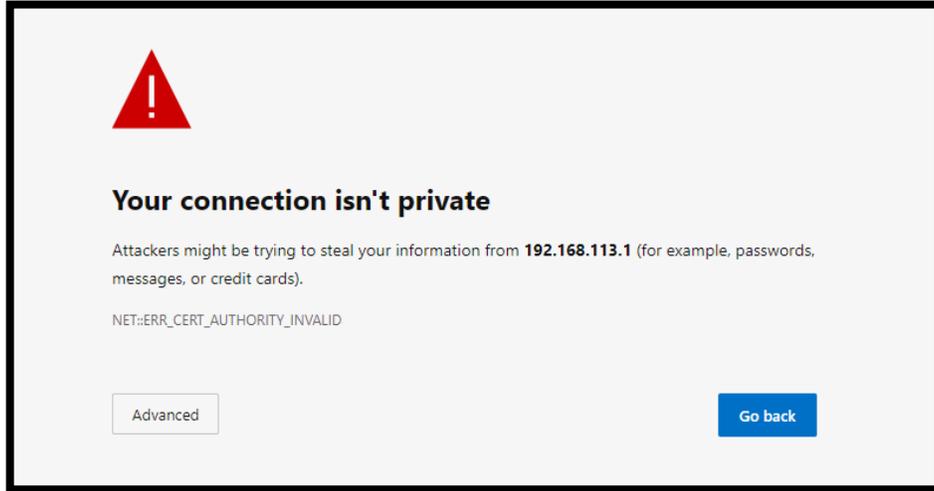

Step 4: Access Mission Control

Open a web browser and navigate to the following URL: <https://192.168.113.1>

Note: The above IP address is MegaFi's default login to its GUI called Mission Control. If the device's IP address was previously changed, use that instead.

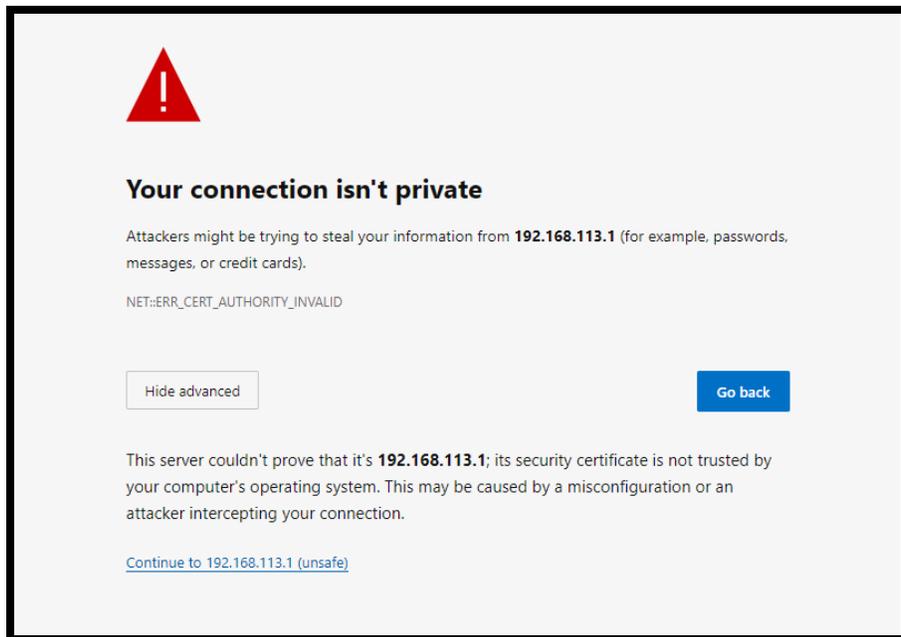

Step 5: Navigate Past Connection Warning Screen

The first time you try to connect to the MegaFi, a connection warning screen will display as shown below. If so, follow the steps below to get past the warning screen. Otherwise, skip this step.

5.1 Click the 'Advanced' Button

A second warning screen will display:

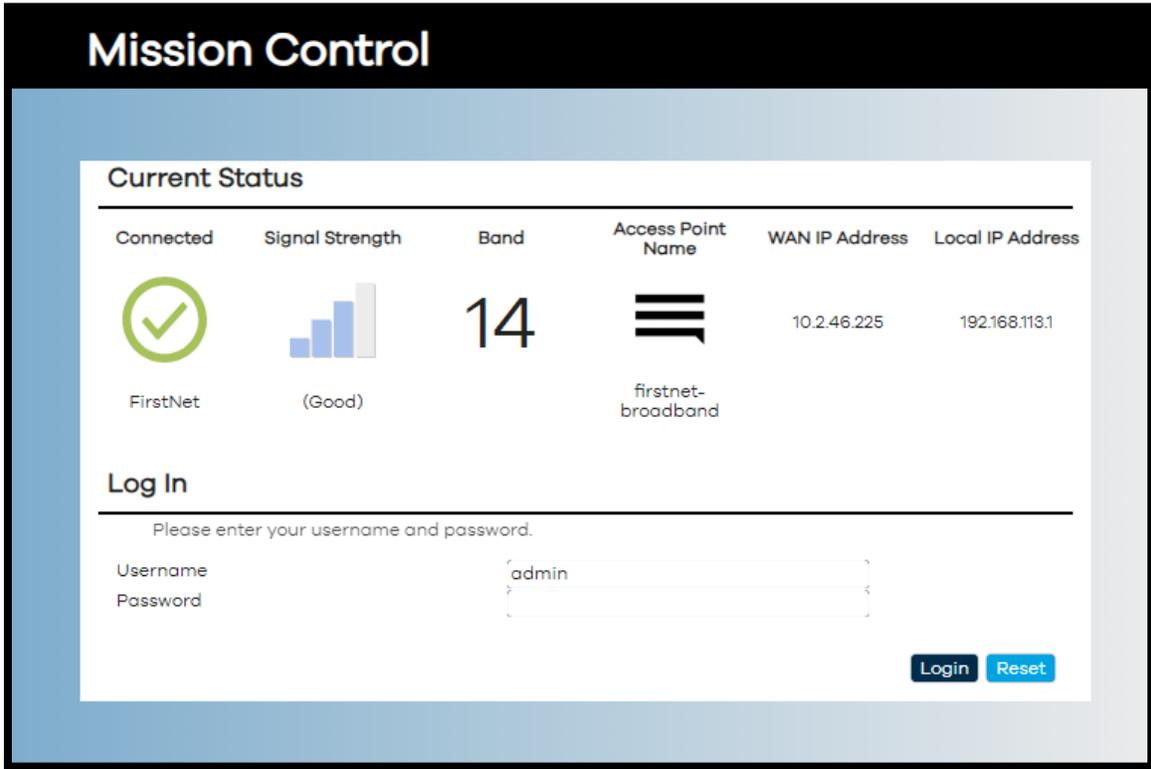

5.2 Click URL on Screen

Click the '*Continue to 192.168.113.1 (unsafe)*' link at the bottom.

Step 6: Log In to Mission Control

The MegaFi's Mission Control GUI login page will now be displayed.

6.1 Enter Password and Log In

- 1) Enter the password that is on the label on the bottom of the MegaFi that you are updating, unless it was previously changed, use that instead.

Note: Username defaults to: *admin*

- 2) Click the 'Login' button.

Step 7: Accept End User License Agreement

When logging in for the first time, the EULA (End User License Agreement) will be displayed. Fill out the requested information and click **'Accept'** to continue. Otherwise, skip this step.

End User Licence Agreement

Nextivity Inc. ("Nextivity")
End User License Agreement ("EULA")
Version Date: July 25, 2023

BY ACCEPTING THIS EULA, EITHER BY INDICATING YOUR ACCEPTANCE, BY EXECUTING A QUOTE OR ORDERING EQUIPMENT OR SERVICES DIRECTLY WITH US OR THROUGH AN APPROVED NEXTIVITY DISTRIBUTOR OR RESELLER (HOWEVER TITLED, REFERRED TO HEREIN AS AN "ORDER"), OR BY DOWNLOADING, INSTALLING AND/OR UTILIZING ANY OF THE SERVICES (DEFINED BELOW), YOU AGREE TO THE TERMS AND CONDITIONS OF THIS EULA. THIS EULA IS A LEGALLY BINDING CONTRACT BETWEEN YOU AND NEXTIVITY AND SETS FORTH THE TERMS THAT GOVERN THE LICENSES PROVIDED TO YOU HEREUNDER. IF YOU ARE ENTERING INTO THIS EULA ON BEHALF OF A COMPANY OR OTHER LEGAL ENTITY, YOU REPRESENT THAT YOU HAVE THE AUTHORITY TO BIND SUCH ENTITY TO THIS EULA. ANY CHANGES, ADDITIONS OR DELETIONS BY YOU TO THIS EULA WILL NOT BE ACCEPTED AND WILL NOT BE A PART OF THIS EULA. IF YOU DO NOT AGREE TO THIS EULA, YOU MUST NOT DOWNLOAD, INSTALL, OR USE THE SERVICES.

This Nextivity End User License Agreement ("EULA") is between Nextivity (or "we" or "us") and the user ("User" or "You" or "Your") of the Services, as defined below. This EULA applies to Your use of:

- (1) the Nextivity equipment ("**Equipment**");
- (2) the Nextivity on-premises, installed software that initialize and enables the Equipment ("**Installed Software**");
- (3) the Nextivity cloud-based software that allows You to manage and configure Your Equipment ("**Cloud Software**");
- (4) the written and visual materials Nextivity may provide to aid You in Your use of the Equipment, Installed Software and Cloud Software ("**Documentation**"); and
- (5) any training or support services performed, either remotely or in person, by Nextivity ("**Support**"). The Installed Software and Cloud Software may be referred to together as the "**Software**." The Software, Equipment, Documentation and Support may be referred to collectively as the "**Services**." This EULA also incorporates any Equipment-specific terms that may apply to the Equipment You acquire ("**Supplemental Terms**").

Section 1. Using the Services

1.1 License and Right to Use. Nextivity grants You a non-exclusive, non-transferable, non-sublicensable, revocable (a) license to use the Installed Software; (b) right to use the Cloud Software; and (c) right to use the Documentation solely in connection with Your use of the Software and Equipment, each as acquired from Nextivity or an approved reseller or distributor of Nextivity ("**Approved Provider**"), solely for Your internal business purposes during the Usage Term (as defined in Section 1.6 below), subject to the terms of this EULA and the applicable Order (collectively, the "**Usage Rights**"). Nextivity reserves all rights, title, and interest in and to the Services, including all related intellectual property rights, subject to the limited rights expressly granted hereunder.

First Name

Last Name

Company (optional)

E-Mail

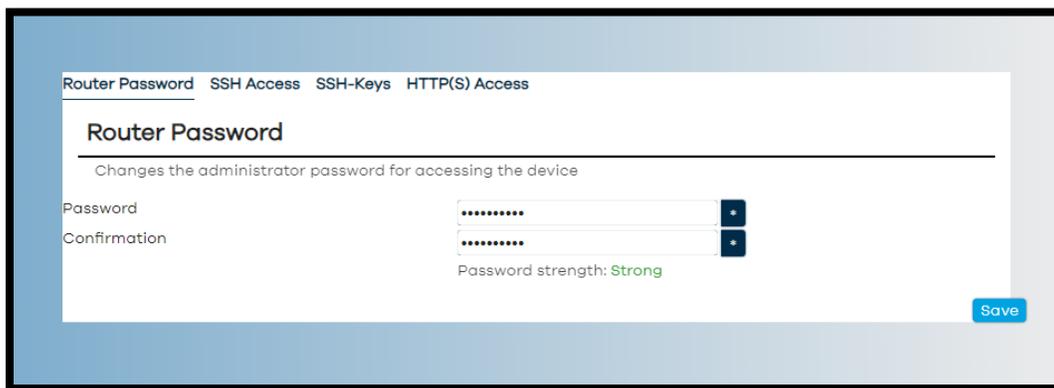

Step 8: Change Router Password

If logging in for the first time, the 'Router Password' window will open and requires the user to change the default password. Otherwise, skip this step.

1) Enter the new desired password.

Note: The device will not accept *weak* passwords. Password must meet the following requirements: a minimum length of 10 characters and a randomized complexity of lowercase letters, uppercase letters, and numbers.

2) Click the 'Save' button.

Step 9: Upload MegaFi Firmware

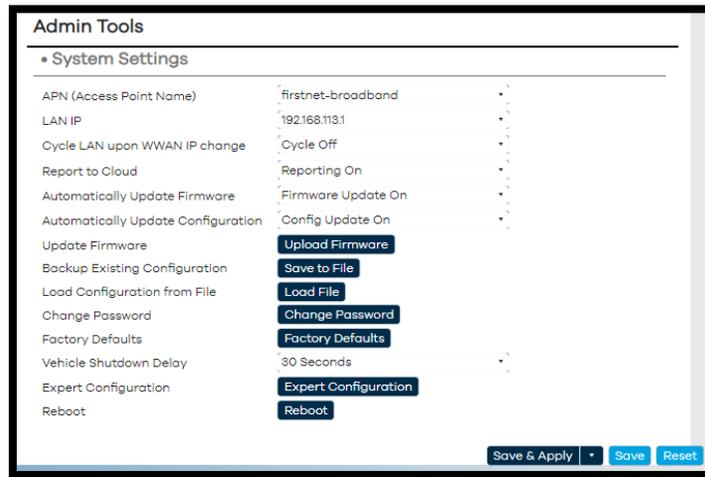

1) Mission Control will now display the device Overview page.

MegaFi Status	
Model	ATEL-MEGAFI
Serial Number	232401002229
Uptime	3d 7h 44m 31s
TX Bytes (since last power cycle)	403.90 MB (375380 Pkts.)
RX Bytes (since last power cycle)	32.84 MB (212498 Pkts.)
Memory	40.41 MIB / 118.89 MIB (34%)

AW12 Status	
System Name	MegaFi-AW12
Location (Lat,Lon)	0.000000,0.000000
LTE Connection Status	Connected
Signal Percentage	78%
Cloud Connection Status	Connected (11/6/2023, 4:02:02 PM)
Data Post Status	Disabled
IMEI	015681000023747
Phone Number	858.914.7861
ICCID (SIM)	89011004300029886109
APN (Access Point Name)	firstnet-broadband
Band	14
Home Network (MCC,MNC)	FirstNet (313;100)
TX Power	-10.0 dBm
RX Power (CO)	-64.3 dBm

- 2) Scroll to the bottom of the page and click the 'Upload Firmware' or 'Flash Image' button.

- 3) The 'Uploading file...' window will display:

- 4) Click the 'Browse...' button to locate the firmware file for this example, downloaded in Step 1. Select it and click 'Open' to proceed.

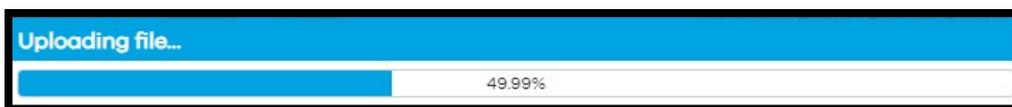

Step 10: Uploading Firmware File

- 1) After selecting the file, you will be returned to the 'Uploading file...' window.

- 2) Click the 'Upload' button.

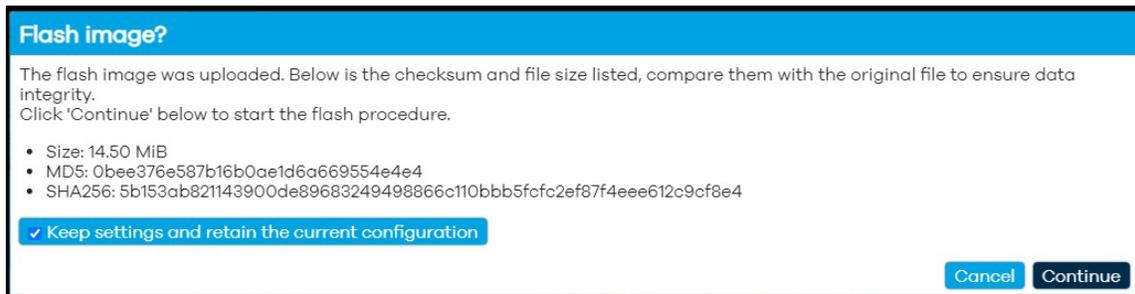

Note: The file will be uploaded, during which a progress bar is displayed:

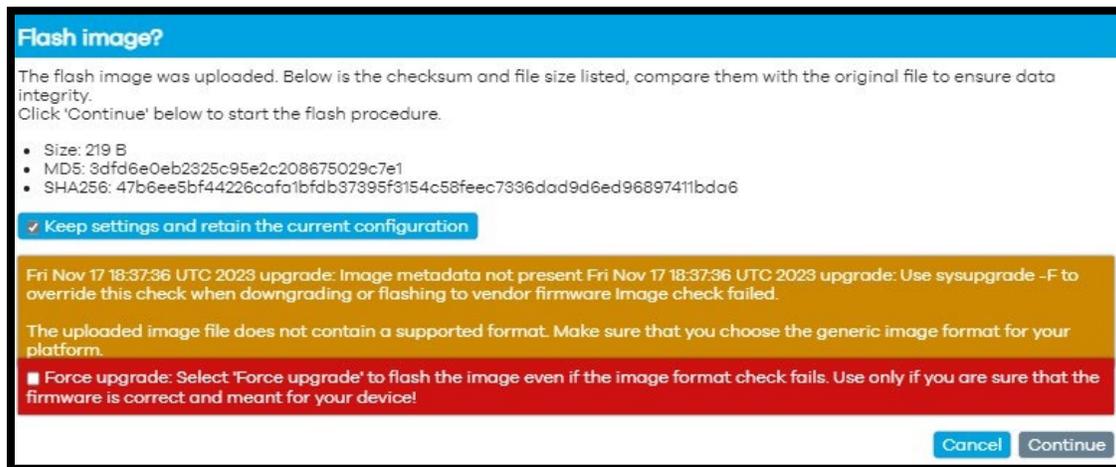

Step 11: Verify Checksum Value

After the file uploading completes, the 'Flash image?' window will display.

- 1) Manually verify the checksum value listed on your screen with the supplied checksum value noted in step 2. This will be the SHA256 alpha-numeric value on the Flash image display below:

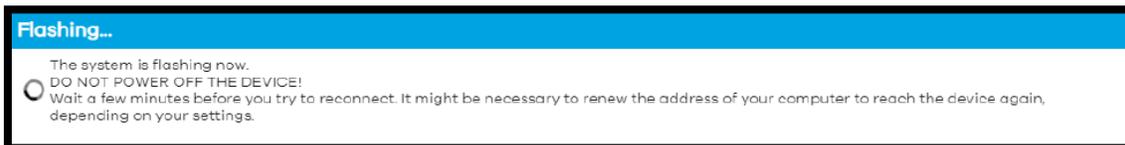

Note: If you accidentally try to upload the wrong file to the MegaFi device, a warning screen will be displayed (see example below). If this happens, **STOP - DO NOT PROCEED**. Select 'Cancel' to back out of this operation and avoid "bricking" your device.

- 2) Only proceed if the checksum values match.

Step 12: Continue to Flashing Window

- 1) Click the 'Continue' button.
- 2) The 'Flashing...' window will display.

WARNING: “Do not power off the unit until the image flashing is complete.”

Note: The update will take between 5 to 15 minutes.

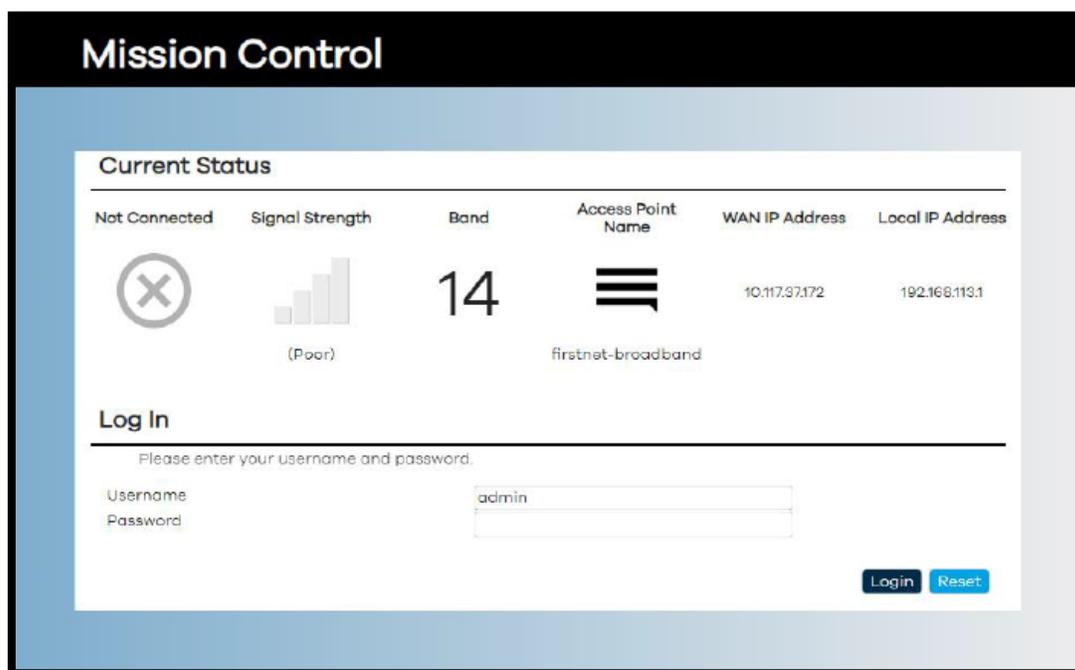

Step 13: Log In to Proceed

When the image flash is complete, you will be taken back to the login page.

- 1) Log in to continue.

Note: Current status may initially display 'Not Connected' and no 'Signal Strength'. It will correct itself once the device properly boots up from the upgrade process.

Note: Refresh the browser if the device has not gone back to home screen after 10 minutes.

Step 14: Verify Firmware

The Mission Control page will display.

- 1) Verify that the intended firmware upgrade successfully loaded by looking at the top right cover of Mission Control. Once verified, firmware update is complete.
