

Cellular Coverage for Warehouses and Distribution Centers

Nextivity has been solving indoor connectivity issues for enterprise customers since 2016.

Proven

to Speed Operations

Hassle-Free

Installation for 1M+ ft² sites

Design Once, Support Everything

Shared infrastructure, future-ready RF planning

Across the world, warehouses and distribution centers trust Nextivity solutions to deliver strong, reliable indoor cellular coverage to improve productivity, safety, and facility monitoring.

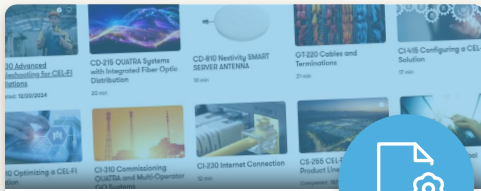

WHY?

- 35% more packages processed - Faster order processing, real-time inventory updates, and automation reliability
- Monitoring working conditions, air quality etc. for health and safety purposes
- Leak detection in areas where fluids are stored or cool storage facilities
- Detecting presence of workers in areas such as loading docks with open dock doors for health and safety
- Tracking of assets such as forklifts. Can include battery level monitoring to ensure forklifts are always charged

Mission-Critical Reliable Wireless Connectivity

- Automation and Robotics
- Data-Driven Management
- Regulatory / Safety Risk Management
- Sustainability and Cost Control Initiatives

1000+

Certified Partners Worldwide

ROI and Use Cases:
